

# CHEAT SHEET: Redmine Macros

## Redmine standard installation

### Usage: Functional

Macro	Example
child_pages	<code>{{child_pages}}</code> <code>{{child_pages(depth=2)}}</code>
collapse	<code>{{collapse(view details...)}}</code> This is a block of text, collapsed by default. <code>}}</code>
hello_world	<code>{{hello_world}}</code>
include	<code>{{include(projectname:Foo)}}</code>
macro_list	<code>{{macro_list}}</code>
toc	<code>{{toc}}</code> <code>{{&gt;toc}}</code>

### Usage: Images & Style

Macro	Example
thumbnail	<code>{{thumbnail(image.png)}}</code> <code>{{thumbnail(image.png, size=300, title=Thumbnail)}}</code>

## Redmine Wiki Extensions Plugin

### Usage: Functional

Macro	Example
count	<code>{{count}}</code> <code>{{show_count}}</code>
fn	<code>{{fn(word,description)}}</code>
Footer	Create a page named „Footer“ in order to see it's content at the bottom of every page
new_page	<code>{{new_page}}</code>
popularity	<code>{{popularity(10)}}</code>
tagcloud	<code>{{tagcloud}}</code>
taggedpages(tagname)	<code>{{taggedpages(tag)}}</code> <code>{{taggedpages(tag1[tag2,...],project)}}</code>

### Usage: Images & Styles

Macro	Example
div_start_tag	<code>{{div_start_tag(id_name)}}</code> <code>{{div_start_tag(class_name)}}</code> <code>{{div_start_tag(id_name, class_name)}}</code>
div_end_tag	<code>{{div_end_tag}}</code>

## Usage: Collaboration

Macro	Example
comments	<code>{{comments}}</code>
comment_form	<code>{{comment_form}}</code>
vote(key)	<code>{{vote(key)}}</code> <code>{{vote(key, descriptive text)}}</code> <code>{{vote(key, label)}}</code>

### Usage: Date & Time

Macro	Example
lastupdated_at	<code>{{lastupdated_at}}</code>
new(yyyy-mm-dd)	<code>{{new(yyyy-mm-dd)}}</code> <code>{{new(yyyy-mm-dd, expire)}}</code>
recent	<code>{{recent}}</code> <code>{{recent(10)}}</code>

### Usage: Users & Contacts

Macro	Example
lastupdated_by	<code>{{lastupdated_by}}</code>
twitter(username)	<code>{{twitter(alphanodes)}}</code>

### Usage: Issues & Projects

Macro	Example
project(project_name)	<code>{{project(project_name)}}</code> <code>{{project(project_name, alias)}}</code> <code>{{project(project_identifier)}}</code> <code>{{project(project_identifier, alias)}}</code>
wiki(project_name, wiki_page)	<code>{{wiki(project_name, wiki_page)}}</code> <code>{{wiki(project_name, wiki_page, alias)}}</code> <code>{{wiki(project_identifier, wiki_page)}}</code> <code>{{wiki(project_identifier, wiki_page, alias)}}</code>

## Redmine CRM Plugin

### Usage: Users & Contacts

Macro	Example
contact	<code>{{contact(contact_ID)}}</code> <code>{{contact(John Smith)}}</code>
avatar	<code>{{contact_avatar(contact_ID)}}</code>
deal	<code>{{deal(deal_ID)}}</code>
note	<code>{{contact_note(ContactNote_ID)}}</code>

## Redmine Knowledgebase Plugin

### Usage: Collaboration

Macro	Example
kb	<code>{{kb(17)}}</code>
article_id	<code>{{article_id(17)}}</code>
article	<code>{{article(5)}}</code>
category	<code>{{category(9)}}</code>

## Redmine DMSF Plugin

### Usage: Files & Folders

Macro	Example
dmsf(id)	<code>{{dmsf(17)}}</code>
dmsf(id, My text)	<code>{{dmsf(17, File)}}</code>
dmsff(ID)	<code>{{dmsff(5)}}</code>
dmsff(ID, My folder)	<code>{{dmsff(5, Folder)}}</code>

## Redmine Wiki Lists Plugin

### Usage: Issues & Projects

Macro	Example
ref_issues	<code>{{ref_issues([options]..., [column]...)}}</code>

#### Options:

-s[=WORD][[WORD]..]  
select issues that contain WORDs in subject.  
-d[=WORD][[WORD]..]  
select issues that contain WORDs in description.  
-w[=WORD][[WORD]..]  
select issues that contain WORDs in subject or description.  
-p[=IDENTIFIER]  
Specify the project by identifier.  
-i=CUSTOM\_QUERY\_ID  
Use custom query by id.  
-q=CUSTOM\_QUERY\_NAME  
Use custom query by query name.  
-f:ATTRIBUTE[=WORD[WORD...]]  
Additional filter.

#### Available columns:

project	fixed_version
tracker	start_date
parent	due_date
status	estimated_hours
priority	done_ratio
subject	created
author	
assigned_to	
updated_on	
category	

## Additional Plugin

### Usage: Date & Time

Macro	Example
calendar	<code>{{calendar(year=YEAR, month=MONTH, show_weeks=BOOL, select=DATE)}}</code>
current_year	<code>{{current_year}}</code>
current_month	<code>{{current_month}}</code>
current_day	<code>{{current_day}}</code>
current_hour	<code>{{current_hour}}</code>
current_min	<code>{{current_min}}</code>
current_weekday	<code>{{current_weekday}}</code>
last_updated_at	<code>{{last_updated_at}}</code>
recently_updated	<code>{{recently_updated([14])}}</code> default is 5 days

### Usage: Users

Macro	Example
group_users	<code>{{group_users(Team A)}}</code>
last_updated_by	<code>{{last_updated_by}}</code>
user	<code>{{user(1)}}</code> <code>{{user(1, avatar=true)}}</code> <code>{{user(admin, avatar=true)}}</code> <code>{{user(1, format=firstname)}}</code>

### Usage: Projects, Issues & Comments

Macro	Example
issue	<code>{{issue([OPTIONS])}}</code> <code>{{issue(1)}}</code> <code>{{issue(1, format=full)}}</code> <code>{{issue(http://redmine.url/issues/1#note-3)}}</code>

#### Options:

url (string or note\_id)  
format=(string). e.g. full, text, short, link  
id (int)  
note\_id (int). To link to an issue comment

projects	<code>{{projects}}</code> <code>{{projects(title=My project list)}}</code> <code>{{projects(with_create_issues=true)}}</code>
----------	---

# CHEAT SHEET: Redmine Macros

## Additional Plugin

### Usage: Informational

Macro	Example
cryptocompare	{{cryptocompare(Options)}} {{cryptocompare(fsyms=BTC, type=header)}}

#### Options (widget type has to support it):

fsym (string)  
tsym (string)  
fsyms (string). E.g. BTC, ETH, LTC  
tsyms (string). E.g. EUR, USD  
period (string) – 1D, 1W, 2W, 1M, 3M, 6M, 1Y

type (string) – advanced, chart (default), converter, header, header\_v2, header\_v3, historical, list, news, summary, tabbed, titles

gmap	{{gmap(Options)}} {{gmap(q=Munich)}} {{gmap(mode=directions, origin=Munich+Implerstr, destination=Roma)}}
------	---

#### Options:

q (string) – city or location  
mode (string) – place, directions, search, view  
width (int)  
height (int)

meteoblue	{{meteoblue(location[Options])}}
-----------	----------------------------------

#### Options:

location (string) – weather location e.g. Munich germany is *münchen\_deutschland\_2867714* (part after <https://www.meteoblue.com/en/weather/forecast/week/>)  
width (int)  
height (int)  
color (bool)  
pictoicon (bool)  
maxtemperature (bool)  
mintemperature (bool)  
windspeed (bool)  
winddirection (bool)  
uv (bool)  
humidity (bool)  
precipitation (bool)  
precipitationprobability (bool)  
spot (bool)

tradingview	{{tradingview(Options)}} {{tradingview(symbol=NASDAQ:AMZN, locale=en)}}
-------------	--

#### Options:

symbol (string)  
width (int)  
height (int)  
interval (string)  
timezone (string)  
theme (string)  
style (int)  
locale (string)  
toolbar\_bg (string)  
enable\_publishing (bool)  
allow\_symbol\_change (bool)  
hideideasbutton (bool)

## Usage: Social media

Macro	Example
gist	{{gist(GistName)}}
iframe	{{iframe(url [, width=INT, height=INT, with_link=BOOL])}}

#### Options:

width (int)  
height (int)  
url (string)  
with\_link (bool)

reddit	{{reddit(redmine)}} {{reddit(r/redmine)}}
--------	--

slideshare	{{slideshare(Options)}} {{slideshare(5793230, slide=5)}}
------------	---

#### Options:

key (string) – key code from end of URL  
width (int)  
height (int)  
slide (int)

twitter	{{twitter(alphanodes)}} {{twitter(@alphanodes)}} {{twitter(#redmine)}}
---------	--

vimeo	{{vimeo(video[Options])}} {{vimeo(1234566, width=800)}} {{vimeo(1234566, autoplay=true)}}
-------	---

#### Options:

width (int)  
height (int)  
video (string)  
autoplay (bool)

youtube	{{youtube(video[Options])}} {{youtube(1234566, width=800)}} {{youtube(1234566, autoplay=true)}}
---------	---

#### Options:

width (int)  
height (int)  
video (string)  
autoplay (bool)

## Redmine DB Plugin

### Usage: Assets

Macro	Example
db	{{db(17)}}
db_query	{{db_query(7)}}
db_tag	{{db_tag(Server)}} {{db_tag(Server, title=Wichtig)}}
db_tag_count	{{db_tag_count(Server)}} {{db_tag_count(Server, all_projects=true)}}

## Redmine Passwords Plugin

### Usage: Security

Macro	Example
password	{{password(17)}}
password_query	{{password_query(7)}}
password_tag	{{password_tag(Login)}} {{password_tag(Login, title=Wichtig)}}
password_tag_count	{{password_tag_count(Login)}} {{password_tag_count(Login, all_projects=true)}}
